New criteria of forklift trucks

Hyundai introduces a new line of 7E series diesel forklift trucks. Excellent power and performance make your business more profitable.

The new master on the job-site!

Smooth running, efficient and ergonomically designed, 35/40/45D-7E, 50D-7AE series are made to meet your needs.

HMC D4DD

High power engine - HMC D4DD

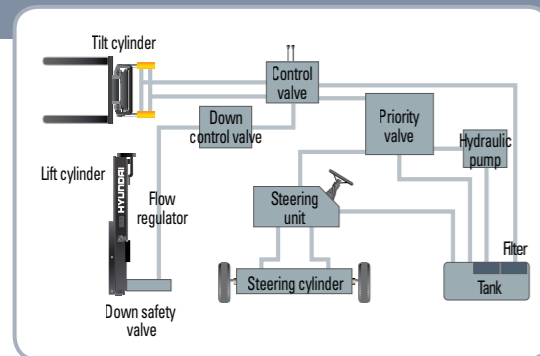

Market approved quality of HMC D4DD engine ensures incomparable performance, durability and excellent fuel efficiency. This engine meets EPA Tier-III and EU stage IIIA emission regulations.

70kW/2,300rpm
35kgf-m/1,600rpm

Fast and stable performance

Being able to quickly raise and lower the mast, as well as tilt it forward and backward, providing the best operational conditions during unloading. When the truck is fully loaded, mast lowering speed is carefully controlled to ensure safety by the down control valve.

State-of-the-art hydraulic system

The latest large-capacity hydraulic system reacts quickly during operation, and a low-noise control valve increases both efficiency and durability.

OPSS (Operator Presence Sensing System)

Control of mast tilting, lifting and lowering is not possible through operation of the appropriate control when the operator is not in the seated position. (Option)

Fully hydrostatic power steering

A hydraulic steering system always guarantees smooth and flexible steering, preventing overrun and kick-back.

Increased mast tilting angle

The mast tilting angle of 8 degrees forward and 10 degrees backward, the operator can safely and rapidly perform loading and unloading jobs.

Faster travel speed & gradeability

The powerful high-output engine provides greater acceleration, better gradeability and faster travel speed on any tough terrain or slope.

Travel speed(Unloaded)

35D-7E : 27.7km/h 45D-7E : 26.7km/h
40D-7E : 26.7km/h 50D-7AE : 26.6km/h

Gradeability(Loaded)

35D-7E : 42.0%
40D-7E : 37.3%
45D-7E : 33.9%
50D-7AE : 31.0%

Ergonomic operator friendly compartment design!

A design based on human engineering relieves fatigue and increases operator's efficiency.

Easily adjustable suspension seat

An attractive and adjustable seat, based on a human engineering design, provides great comfort, safety and durability.

New high visibility for safe operation

The operator is able to work with increased safety and accuracy due to a wider view mast.

Ergonomically positioned pedals

Based on human engineering, the accelerator, brake and inching pedals are optimally positioned for convenience while operating the equipment.

Cup holder & console box

Additional storage spaces are located inside the operating space for operator's convenience.

Quick response of operating control levers

Only minimal operator's effort is required for precise, safe and productive control.

Adjustable steering wheel

Steering wheel with horn button can be adjusted by a lever on the right-hand side for the most comfortable operator position.

Easy and safe shift lever

A single lever on the left side of the steering column gives the operator fast, easy control of direction. The lever must be in the neutral position before the engine can be started.

Secondary Horn

Secondary Horn gives access to lights and horn.

Danger-free through high durability!

Safety and durability are priorities in the design of the equipment.

Strong overhead guard

The safety overhead guard exceeds EEC and ANSI regulations and protects the operator during hazardous jobs.

Parking brake

Ratchet type parking brake requires less efforts from the operator to set.

Heavy duty single unit frame

Heavy duty single unit type frame, designed on the basis of accurate structural analysis, guarantees durability and safety.

■ Some of the photos may include optional equipment.

Highly durable transmission and drive axle

Powershift transmission provides fast travel speed and quiet travel under any heavy load condition, and boosts work efficiency.

Fuel tank safety valve

Integrated safety check valve shuts off fuel supply in the unlikely condition of a truck overturn.

Expansion bellows

The expansion bellows absorbs vibration and reduces noise generated from the exhaust gas system and also extends the life cycle of exhaust gas system.

Large footboard & hand grip

Wide "open" step offers convenience and safety when entering and exiting truck.

Bright, protected headlights

Bright, protected headlights are positioned for exceptional visibility.

Ground clearance

The engine and transmission are assembled horizontally and positioned high in the frame to protect major components during operation on rugged surface.

Centralized design for easy service!

An ideal arrangement of component parts ensures easy accesses and conveniences for the maintenance.

Easy change air cleaner

The air filter is readily accessible for cleaning or replacement. (7inch Cyclone Type)

■ Some of the photos may include optional equipment.

Visible precleaner

Efficient, accessible pre-cleaner provides for longer engine life

Double battery installation

Easy-to-change radiator

Quick and easy engine oil check

Electrically monitored air filter

Air cleaner sensor alerts the operator of a restricted air filter and allows replacement before damage.

Easy maintenance oil check

The T/M oil level can be checked easily without any disassembly.

Brake fluid reservoir

Highly visible, easily accessible reservoir makes for quicker daily inspections.

An accessible, compact fuse box for easy inspection
